To create H.264 or MPEG-4 picture slideshows in mp4 format for putting on Apple ipod classic, nano, shuffle, Touch 2, touch 3 and touch 4, you need to get picture slide show Maker app software. [DVD Photo Slide Show Maker](#) (Free [Download It](#) Here) is considered to be the best Slide Show Maker app for users to make or create dynamic H.264 or MPEG-4 image slideshows with background music and eye-catching transition effects for iPod classic, nano, shuffle, touch 2, touch 3 or touch 4. The following tutorial will show you how to create or make dynamic H.264 or MPEG-4 picture album slideshows in mp4 format using the best Apple slide show Maker app software.

Step 1. Organize photos and create albums

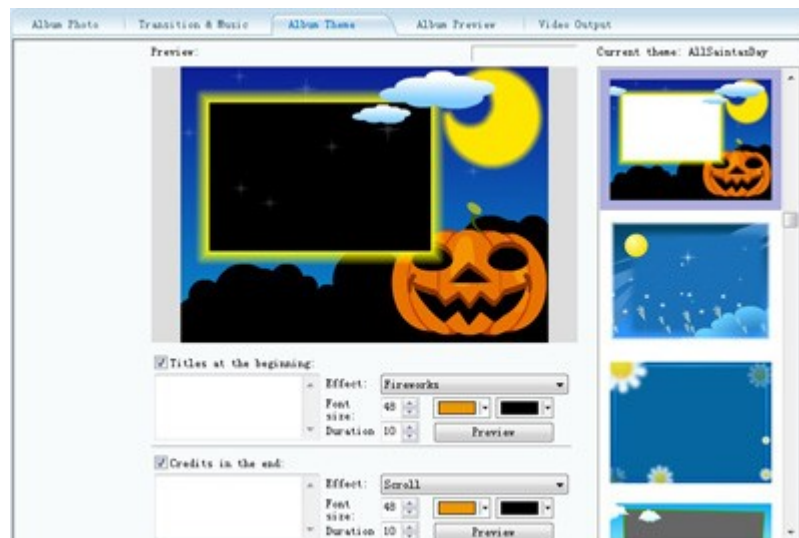

When you run the best Apple slide show maker app software, it automatically opens a new project and lets you start creating a slide show. Please click "Organize Photos" button to create one or more photo album and select pictures from your computer and add them to the particular image album. After creating an image album, you can customize the picture album by adding, deleting photos, arranging the order of photos during slideshow playback, adding captions for photos, selecting transition effects.

Step 2. Add transition music, choose and design album theme

When you click "Transition & Effects" tab, you can add the background music to the image album and select your desired transition effects from more than 260 amazing special transition effects. You can also add the same or different background music to different photo albums (if you create more than one photo albums)

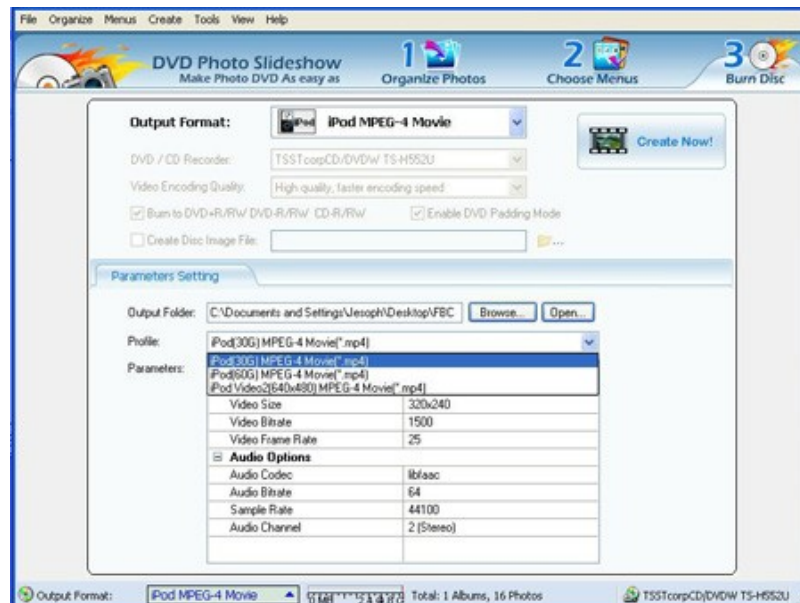

When click "Album Theme" tab, you can select one theme from themes warehouse and add to photo album. You can also design the theme by setting all kinds of parameters such as the Title, Duration, Effect, Font size. Click the "Album Preview" tab and you can preview the theme effect of slideshows.

Step 3. Convert photo album to MPEG-4 or H.264 video for Apple iPod

Click "Burn Disc" button on the Apple slide show Maker app and go to the burning window. Please click the pull-down menu to choose the Output Format as "iPod/iPhone/iPad MPEG-4 Movie". In the "Profile" area, there are some selections for you to choose:

iPod (30G) MPEG-4 Movie(*.mp4), iPod(60G) MPEG-4 Movie(*.mp4), iPod Video2(640*480) MPEG-4 Movie(*.mp4), iPod Touch/iPhone MPEG-4 Movie(*.mp4), iPad H.264 Video, iPad H.264 HD video. Please choose your favorite profile for your slide shows output. You can choose the MPEG-4 or H.264 video output for iPod Touch(2, 3, 4), Nano(3, 4, 5, 6), Shuffle(2, 3, 4).

Once your Apple MPEG-4 or H.264 video is created completely, you may play it in your computer first, then upload the video slideshows to your iPod. After uploading completely, you can play the photo slide show video on your iPod Nano, Shuffle, Touch and enjoy these animating picture album slide shows with amazing transition effects and background music.

Note: How to upload MPEG-4 or H.264 video to your iPod

Firstly, you have to download iTunes app from <http://www.apple.com/itunes/download> then install it on your computer

Secondly, run iTunes and add your MPEG-4 or H.264 video to iTunes Movies Library(Click Movies - Click File menu - choose Add File to Library), then the video will be added to the Movies Library.

Thirdly, use the Apple iPod USB device to connect computer and choose the relevant video to upload to your touch, Nano or Shuffle
