How to import and embed the creative animation videos files in Microsoft PPT presentation?

Before you import and upload Flash Object file, make sure the Flash Object Player is installed on your computer.

Please follow the steps to import Shockwave Flash Object control and insert SWF files in the following:

1. Add "Show Developer tab" into ppt 2007 or 2010 (Not for PowerPoint 2003 or the other old versions).

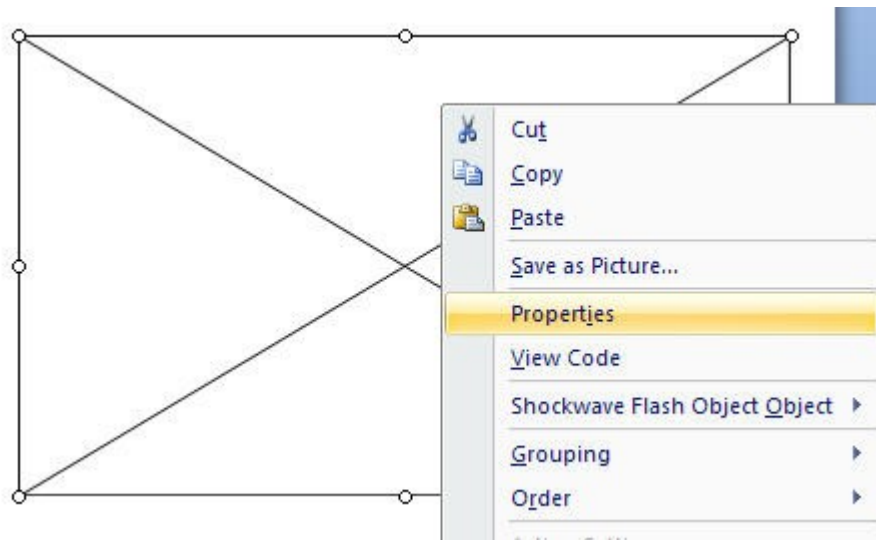

Click Microsoft Office Button on the top left and click "PowerPoint Options", then go to the "PowerPoint Options" window and click "Popular". Please choose "Show Developer tab in the Ribbon" and click "OK".

(View the sample picture)

2. Add "Shockwave Flash Object" into PowerPoint 2007 or 2010. Click the "Developer" tab and go to "Controls" group, then click the icon of hammer and nail for "More Controls" to go to the "More Controls" window. On the "More Controls" window, please select "Shockwave Flash Object" in the list, then click "OK" at the bottom and use your mouse to drag on the panel to resize the control (View the sample picture)

3. Please right click the control to choose "Properties" and go to the "Properties" window, where you can add the related information for movie.

4. On the "Properties" window, you click the "Movie" property and type SWF movie file path into the value textbox, including the file name (e.g. C:\ppt.swf) or URL (e.g. <http://www.yourwebsite.com/ppt.swf> from a website)
