To make your best picture gallery slideshow, you need to free [download the galleries generator software](#) and install it on your PC at first.

The following simple tutorial will teach you how to create dynamic image gallery slide shows for php website.

Tutorial: How to create flash photo gallery slideshow

- 1. Launch this image album slideshow generator plugin and start the gallery project.
- 2. Add the pictures from your computer to the plugin software program. Click "Add" button to add your images from folder on your computer.
- 3. Set the photo slide show playing order. You can use mouse to set the album images playing using "dragging" behavior.
- 4. Decorate your photo gallery slide show pictures. The plugin software allows you to decorate the gallery pictures. Double click one of images and it will pop up "Edit Photo" window, which allow you to decorate gallery photos.
- 6. Choose flash template for photo slideshows. The generator plugin software offers two kinds of templates. You can choose a Basic" template o "Advanced" template for your photo gallery. For example, You can choose a "Advanced" album template for the xml slideshow in the "Advanced" template windows. In this theme window, you can preview your slideshow. The generator also allows you to add the background music into the slide shows. (if you choose the "Basic" template, you will just create a SWF file for slide shows)

- 7. Publish your picture slideshows. To embed and upload the dynamic slides in to your php web page, you need to upload the slide shows to SkyAlbum.com to get the album script code at first. On the "Publish" window, you need to choose "Create Flash files and Upload to SkyAlbum.com" to upload your work.

Tutorial: How to get photo slideshow script code for embedding to php website?

Embed:

SWF URL:

 **Post MySpace**

Share Your Content With Millions of MySpace Users

Step 1: Copy the code below relevant to your HTML implementation

```

<object width="800"
height="600"><param
name="movie"
value="http://www2.skyalbum.com/album2/2009/200910/20091016/socubeliveg/4b2aa6df3b0/christmas_decoration.swf?fs_path=http://www2.skyalbum.com/album2/2009/200910/20091016/socubeliveg/4b2aa6df3b0"></param><param name="wmode"

```

After you upload the picture slideshows to SkyAlbum.com, you will see the slideshow lists and the script code. You can get the easy slide show script code of "Embed" or "Post MySpace" for embedding into your php web site page.

Tutorial: How to insert photo gallery script in to your php web page?

1. Copy the simple picture slideshow script code on SkyAlbum.com website.
2. Paste the image gallery code into the '<Body>.....</body>' of your dynamic php web page.

3. Modify the simple photo album slide show script code. To make your slide shows match your website, you need to change the parameters. For example, you can change the width and height parameter of the script code so that your gallery can match your web page. After you upload the web page with the script code and the other related file to your website directory on the internet, your dynamic image galleries slideshows will be shown on your website.
