Here is a tutorial showing you how to make a dynamic Picture DVD with HD slide show Creator and enjoy on MAC below. (Free [Download DVD Slideshow Maker](#))

There are various slide show Creator Software on the Internet, but less HD slide show creator for creating wonderful picture slide shows for MAC. [DVD Photo Slide show Creator](#) is an easy-to-use slide show producer for users to make eye-catching image slide shows and play them on MAC. But this slideshow producer can't run on MAC OS, so you need to download it on your Windows OS and install it to run. Although it can just run on Windows OS, it can still help you make the dynamic image slide shows for playing on MAC with the built-in DVD player. (Also Review the [3D SWF Flash Gallery Creator](#))

How to create dynamic HD picture DVD Slide shows for MAC?

1. Import the pictures from the collection and create image album.

Run the slide show Creator or producer on your Windows OS. Then click "Add" button to import your image to the slide show producer and create album. You can create more than one album. You can also arrange the slide show image playing order by using your mouse to drag and push.

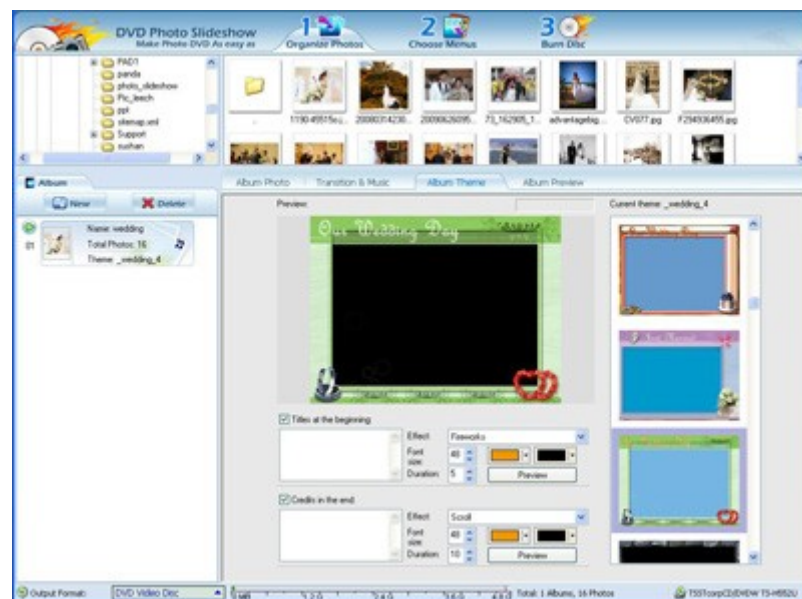

2. Decorate your slide show picture and set the transition effects.

Double click one photo and there will pop up a "Photo Configuration" window, where you can add text, Art clips and set the dynamic transition effects for slideshows.

3. Add background music and choose a theme.

On the "Transition & Music" tab of the Creator, you can click "Add" button to add your background music to the Photo slideshows. If you want, you can also import the music from CD disc for the image slide shows. On the "Album Theme" tab, you can choose a flash theme for your slide shows. If you think the image slideshows are OK, then you will preview the image slide shows on the "Album Preview" tab with the dynamic theme. And these slideshow will be played on MAC DVD player as the same as these are previewed on the slideshow builder.

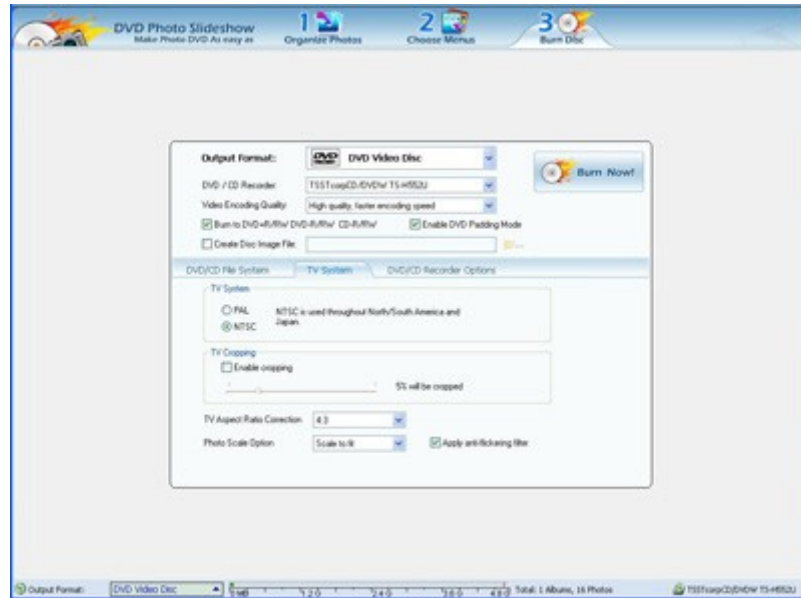

4. Choose a menu for slideshows

Go to the "Choose menu" window of the Creator. In the window, you can choose a beautiful menu for your image slide show. You can also edit or decorate the menu and preview slideshows.

5. Burn the slideshows to DVD disc.

Go the "Burn disc" window this producer. Here you can choose an output format. To play your HD DVD picture slideshows on MAC with the built-in MAC DVD player, you will choose " DVD video Disc" as the image slide show output.

If all is OK, you will click "Burn Now!" button on the producer to burn these HD slideshows to a DVD disc for MAC. When the recording of picture slide shows is complete, you can play them on your Windows OS at first.

6. Enjoy the creative music photo slide show on MAC.

If the HD image slide show is OK, you will put the DVD disc into MAC to play with the built-in DVD player.

You will enjoy the eye-catching picture slide shows on MAC with the beautiful Apple theme style and music.
