3D Photo Album Maker (<http://flash.dvd-photo-slideshow.com>)

Make a photo CD is an ideal way to save your digital collections. However, there are many photo CD formats you can choose from. Your hundreds of photos can be burned to a CD-R as raw data format, you can make some slide show packages or share on web etc.

Here we introduce a new way to make your photo slide show CD. Since Video CD 2.0 standard support high quality still image, why couldn't we store our pictures on Video CD, so we can share photos in the comfort of our living room with a big screen TV?

According to Video CD 2.0 standard, the image resolution shown on TV can be as high as 704x576. The quality is as good as DVD. and you can advance the photo slide one by one with the DVD player remote controller. Now, almost all home DVD players support Video CD 2.0 standard, so you can mail your photo slide show video CD to your friends and family. Background music can be added to the photo slide show which turns the photo CD to an exciting photo TV show.

Besides watching the picture on TV, the video CD can also restore your original image files. The CD-R medium can safely store your value photo for a long long time, so you will never be afraid to lost your photos. You can even bring your Video CD to the mall and print them in the future. No quality will be lost.

Enn...It seems a great idea, but how?
