

How to make a Flash Photo Slideshow and upload to Yahoo! 360 Blog

Do you want to show your photos on **Yahoo! 360°** blog? Please read this guide, we will show you how easy it is to show your photos on your blog with background music, amazing animation effect. ([Flash Photo Slideshow Maker](#))

First of all, click [here](#) to view the final blog post this guide will create.

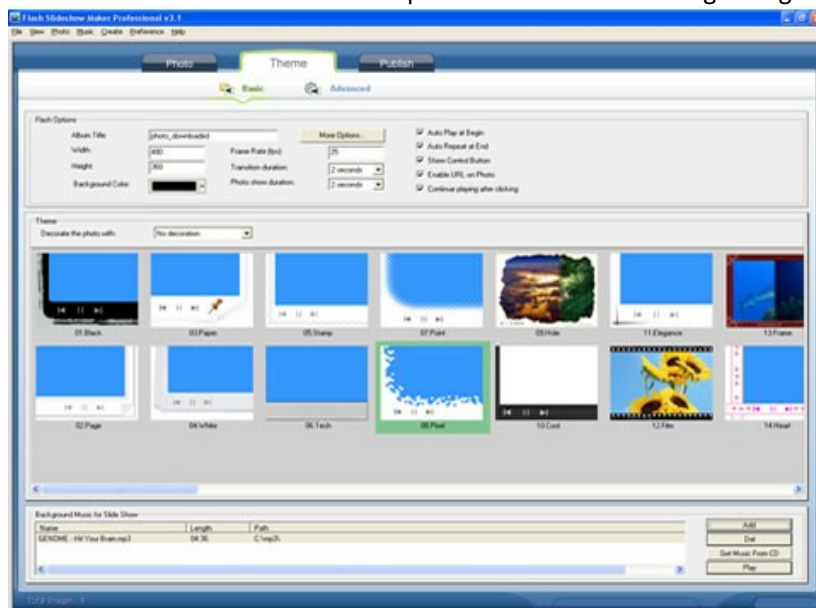

The following steps will show how to make such a photo slideshow blog post.

Step 1. Open Flash Slideshow Maker, add the photos to the software.

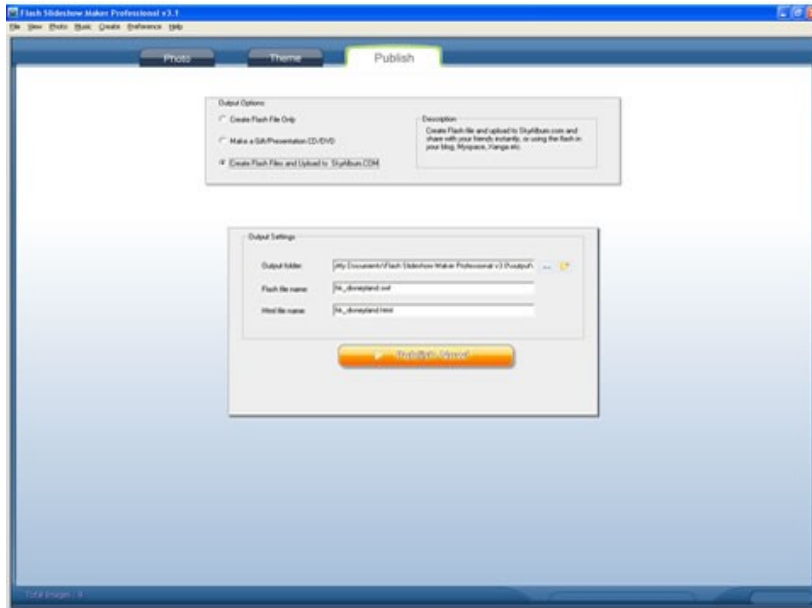

Step 2. Select a theme for Photo Slideshow.

Click the "Theme" button on the top toolbar and the following dialog will show.

At this step, you could select a theme from more than 50 templates. You can also add background music for your photo Flash slideshow.

Step 3. Publish Flash Slideshow and Upload to SkyAlbum.com

Create "Publish" button and select the output option "Create Flash Files and Upload to SkyAlbum.com".

After uploading to the SkyAlbum.com, you can view your photo slideshow on the web.

At the right side, you could see a text with the title of "Embed:", just copy the code to clipboard.

Step 4. Post Flash Slideshow Code on Yahoo! 360° blog

Then open your **Yahoo! 360°** blog editor:

Blog Compose

Post a new entry in your blog.

Your entry can consist of text, a photo, or both. Each entry must have a title.

Entry Title:
Flash Slideshow Maker for Yahoo 360

Photo (Please use JPEG file format only. Examples: .jpg, .jpe, or .jpeg. Max size is 5MB)

Click Preview to see this photo.

Entry Content:

Flash Slideshow Maker Sample for Yahoo 360 Blog:

<embed
src="http://www.skyalbum.com/album/tomy/463fd6040bd/hk_disneyland.swf"
type="application/x-shockwave-flash" wmode="transparent" height="360"
width="480">

Most HTML is OK. [Learn more.](#) [Create Poll](#)

Check the "View HTML Source" option, then paste the clipboard to the editor, keep the section from "<embed " to "</embed>" and delete the others, i.e keep the code like:

```
<embed src="http://www.skyalbum.com/album/tomy/463fd6040bd/hk_disneyland.swf"
type="application/x-shockwave-flash" wmode="transparent" height="360"
width="480"></embed>
```

in the editor.

Step 5. Click "Save" to post your blog, and that's all.

You can also have a try the DVD [Photo Slideshow](#) for showing picture on TV.
