## Some simple guides for you to make or create MP4, H.264, MPEG-4 video slide shows for iPhone 4.

1. Run the best video slide show app software. When you run the best app software, you will see an easy-to-use user interface and all kinds of function panel.
2. Click the "Add" button to import your digital pictures from your computer and create image album. You can add more than 1000 photographs to the app for creating video picture slide shows. You can create more than one image album if you want to create more than one slide show videos.
3. Add the background music to the video slide shows. Click the "Add" button on the "transition & Music" panel to add your background song. You can add more than one piece of music to the image slideshows. But the picture slide show duration time should be equal the song duration time.
4. Choose the transition effects. On the "transition & Music" panel, you can also set the transition effects for the song image slide shows. There are over 260 transition effects for you to choose for slideshows.
5. Choose the Album theme. On the "Album Theme" panel, you can choose the eye-catching flash theme for your video picture slideshows. There are all kinds of dynamic flash themes for choosing. And you can also preview the slide show theme on "Album Preview" panel and this will be the same as that showing on iPhone 4.

- 6. Go to the "Burn disc" window. In the window, you will need to choose the video slide show output as a MPEG-4, H.264 video in mov or mp4 format for iPhone 4. You can choose "iPod/iPad/iPhone MPEG-4 Movie" as the output, and select "iPhone MPEG-4 Wide Screen (\*.mp4)" as the output file. A wide screen mp4, MPEG4, H.264 video will allow your slide show to be looked more wonderful on iPhone 4 . After setting, then click "Click Now! " button to create your dynamic mp4, H.264 or MPEG-4 music slide shows.
- 7. Upload and enjoy the mp4, H.264 or MPEG-4 video slideshows on your iPhone 4. When the video image slide shows are OK, you will upload them to your iPhone 4 to enjoy eye-catching music image slide shows. You will see that you picture slideshows playing with the background song and animating transition effects on iPhone 4
