With the easy slideshow creator, you can add pictures or images and audio file and burn photo slide shows in to a disc, customize your DVD menu and write the menu text. After you make or create a digital slide show DVD, you can play the image Slide shows on TV with a DVD player, computer or other portable DVD player device.

How to make digital Picture Slide show and burn into DVD disc with Windows DVD Maker

Run Windows DVD Maker on your Windows Vista or Windows 7 OS. (Please click start, click All Programs and choose Windows DVD Maker). If you are the first time to use Windows DVD Maker to make slide shows, it will show you the welcome interface.

Part 1. Add photos to the Slide Show project:

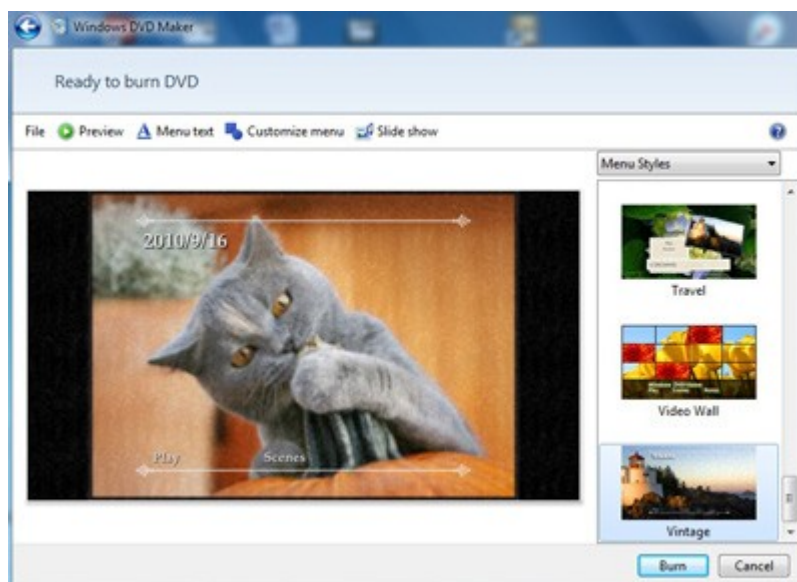

Click "Choose Photos and Videos" button to the main project interface, where you can add digital pictures, images or photos and videos.

Click "Add items" to import your digital picture into the slideshow creator one by one or add all images at a time. Here you can also set your DVD title at the bottom of the window. You can also set the slides photo order by right clicking the picture and choose "Move Up" or "Move Down". If you do not like the image, you can also right it and choose "Remove". You can also click "Option" to the "DVD Options" Window, where you can do the settings like DVD playback settings, DVD aspect ratio, video format and burning speed.

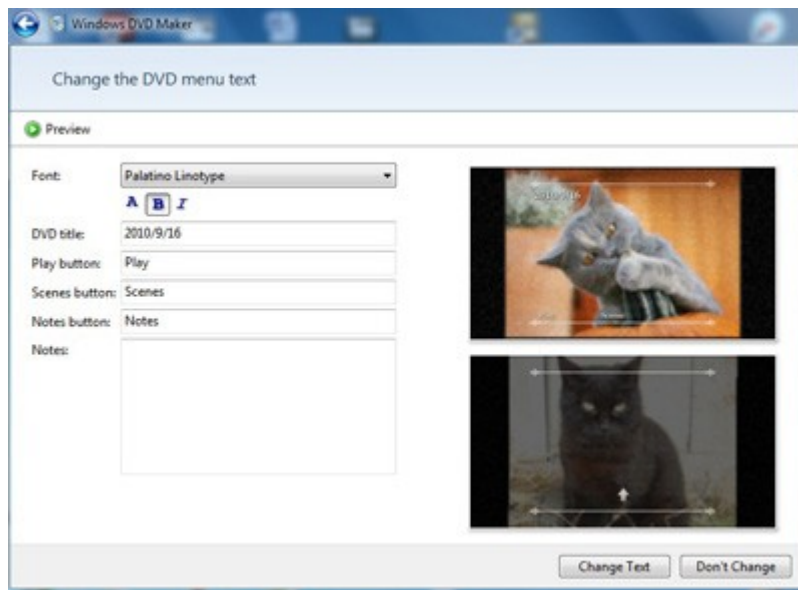

□ Part 2. Customize the Image DVD Slide show

Click "Next" button to the "Ready to burn DVD" window, where you see some selections (Preview, Menu Text, Customize menu, Slide Show and Menu Styles).

In the "Menu Styles" drop-down list, you can choose an eye-catching DVD menu for your picture slideshows. Click "Slide show" and there will pop up a dialog window, where you can add background

music into the picture slide shows. Click "Customize menu" and there will also pop up a window, where you can customize the DVD menu by doing some settings.

Click "Menu Text" and pop up a "Change the DVD menu text" window, where you can change the slideshow text on the menu. If you think all is OK, click "Preview" to preview your Image slide shows.

Part3. Burn the Photo Slideshows into a DVD disc

If you think your Picture Slide shows are OK, you then input a blank DVD disc into your computer and click "Burn" button to burn the image slideshows in to the DVD disc. When the encoding is complete, you will get your professional-looking Picture DVD Slide show on the disc for playing on TV, computer and other portable DVD player device.

Note: Now, you have known how to make picture slide show and burn image slide shows into DVD with Windows DVD Maker. But it not the ideal and professional Slide show maker for users to use.
